## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 December 2004 has been entered.

### ***Response to Amendment***

This Office action has been issued in response to previously-submitted amendment now entered. Applicant's arguments have been carefully and respectfully considered in light of same, and they are persuasive. However, the instant amendments to the claims have necessitated additional claim rejections, as will be detailed below. As this is the first action on merits following an RCE, this action has NOT been made final.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 16 recite the limitation "storing the determined subsets" in it (there are no line numbers). There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2187

Are the most recently accessed queue descriptors the "subset" claimed? There are several instances in each claim of "the subset."

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Rosenbluth et al (US Patent Application Publication US 2003/0115426), Wolrich et al (US Patent Application Publication US 2003/0115347), and Wolrich et al (US Patent Application Publication US 2003/0110166), each taken separately.

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The claims, in so far as they are clear, are clearly anticipated by the three publications supra. In the interest of efficiency, examiner has refrained from writing out the entire rejection, as it is anticipated applicants will submit a 131 or 132.

However, examiner wishes to remind applicants of the requirements for such submissions in MPEP, and note that such submissions must meet the standards therein strictly.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
